PROFESSIONAL SUMMARY

Informatics Engineering graduate from Universitas Pasundan (GPA 3.55 / 4.00) with practical experience in web and application development, from database design and REST API implementation to responsive front-end interfaces. Proficient in JavaScript, TypeScript, PHP, and Java, with working knowledge of React.js, Next.js, Laravel, Express, and relational databases. Experienced in building end-to-end systems, conducting black-box testing, and producing structured technical documentation, supported by a leadership background in student organizational management.

WORK EXPERIENCE

UI/UX Designer (Internship) – PT Anugrah Rizkie Gunung Sep 2025 – Nov 2025

- Collaborated with developers and cross-functional stakeholders to refine designs and verify that implementation matched the approved prototypes.
- Produced wireframes, mockups, user flows, and interactive prototypes in Figma based on user requirement analysis and an established design system.

ORGANIZATIONAL EXPERIENCE

General Secretary – HMTIF, Universitas Pasundan Jun 2025 – Jun 2026

- Managed organizational administration including correspondence, documents, meeting minutes, and archiving, keeping governance structured and auditable.
- Coordinated communication and administrative requirements across members and divisions so that work programs ran according to schedule.
- Supported activity planning and execution, and compiled accountability reports for each program.

PROJECTS

POS Toko Hakim – Offline-First Wholesale Cashier Application 2026
Developer | Personal Project

- Built a point-of-sale web application using Express 5, PostgreSQL, React.js, and PWA technology, designed to keep operating without an internet connection.
- Implemented barcode scanning, multi-tier units, stock rules, and automated sales and inventory reports.

Portable GPS Tracker with Administrative Geofencing (Undergraduate Thesis) 2026
Developer | Team Project

- Developed a portable tracking device on ESP32 and a real-time web monitoring platform using Laravel, PostgreSQL, and MQTT.
- Validated administrative-boundary geofencing through 113 black-box test cases with a 100% success rate.

EDUCATION

Universitas Pasundan – Bandung 2022 – 2026
Sarjana Teknik Informatika (Bachelor of Informatics Engineering) | GPA 3.55 / 4.00

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, PHP, Java, Kotlin, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Laravel, Express 5, Bootstrap, Tailwind CSS

Backend & APIs: Node.js, REST API, API Integration, MQTT, Redis

Databases: MySQL, PostgreSQL, SQLite

Tools & Practices: Git, GitHub, Postman, Figma, Laragon, Black-box Testing, Technical Documentation

Soft Skills: Team Coordination, Communication, Time Management, Problem Solving, Leadership
